

John Hankin
2.8.1 Exercise

Histogram of fares of third class passengers.

Box plot of the fares of third class passengers.

It can be seen in the box plot that there is a single outlier near 500.

```
table(titanic$Embarked, titanic$Survived)
```

```
  0  1  
C 75 93  
Q 47 30  
S 427 217
```

It appears that passengers that departed from "C" had a greater survival rate.
