Many academics and students in developing countries report that major journals are often unavailable to them.

World
population
as of 2006

Territory size shows
the proportion of all
scientific papers
published in
2001 written by
authors living there.

Current data at: <http://data.worldbank.org/indicator/IP.PAT.NRES>

SCIENCE, TECHNOLOGY, AND INNOVATION

Many other countries continue to lag behind on scholarly production.

New categorization of countries that reflects a nation relative strengths in science, technology, and innovation:

- Strong science, technology, and innovations capacity
- Moderate capacities
- Weak capacities
